

Open Seminar by Project Marginal Land

Advances in Fertilization

Dr. Uri Yermiyahu

Head of the Gilat Research Center,
Agricultural Research Organization of Israel

Date: 18th September (Tue) 11:00~12:00

Place : active learning space of ALRC

Contact: Dr. Fujimaki (Division of Agricultural Production)

- Major research activities in Gilat Research Center
- Recent advances in plant nutrition and fertilization of crops.

Dr Uri Yermiyahu is a Senior Researcher at the Agricultural Research Organization (Volcani Center) of Israel. His PhD is from The Hebrew University of Jerusalem. Dr Yermiyahu currently serves as the head of the Gilat Research Center and is the founder and director of the ICL-ARO Center for Fertilization and Plant Nutrition. Dr Yermiyahu's research interests focus on plant nutrition and fertilization of crops. His contributions include understanding influences of plant nutrition on biotic and abiotic stress causing factors, mineral requirements in agriculture in desert environments, salinity and toxicity in plants, and managing nutrients as a function of irrigation water quality. He has worked with brackish, recycled and desalinated water and with horticultural crops ranging from fresh herbs and flowers to vegetables and fruit trees.
